Valid through to November 30th.

DECT-Com II PELTOR™

Wireless Duplex Intercom System

DECT-Com II™ has been designed to provide interoperability with other wireless communication systems. DECT-Com II™ can interface directly with most existing two-way radio systems and join in the PTT system. Using a designated PTT button, the DECT-Com II™ unit broadcasts into the two way radio system. Interface connectivity is available for most analog and digital professional radios. The ability to cross-team communicate from one team to another opens new levels of productivity and safety.

Key Features - Base Station

- Up to 9 portables in one conference
- Conference mix can include 4 wire connection
- Second conference for Portable team
- Dual antenna
- Radio Interface to two-way radio systems

Applications:

Peltor DECT-Com II™ has been used in a wide variety of customer applications including TV studios, coach communications, aircraft support and push-back, fire crews and emergency teams along with other teams demanding full duplex and hands free operations.

Key Features - DECT-Com II portable system

- Compact full duplex portable
- Outdoor range 250 metres with line of sight
- Indoor range typically 50 metres
- 40 hour operation per charge
- Voice prompts for simple set up

Radio Interface Option

Interoperate with existing two-way radio networks with the PTT radio interface option which allows all members of the DECT-Com team to connect to a professional radio channel or talkgroup. Interface is available for most brands. Speak to us for more information.

BIGGER DEALER MARGIN

...WPXSC SERIES

Winning a big communications contract often calls for multi-chargers. The Wireless Pacific Smartchargers will accommodate most current and classic two way radio models, brands or battery chemistries. Our new high margin - lower cost dealer pricing helps you win that competitive bid. Wireless Pacific SmartChargers can be desk or rack mounted (with optional mounting kit) and operate on both AC or DC power. ●

SUMMER'S COMING...OH & S DUTY OF CARE

Frequent and constant use of earpieces can significantly increase the bacterial growth in the ear canal and sharing of earpieces can be a potential health risk. It is therefore always better not to share someone else's earpieces. After all, you wouldn't share a toothbrush! With the warmer months coming, remind your customers how their OH & S duty of care imperatives can be met by supplying their staff with individual earpieces.

To help you make your case while growing your margins, we have permanently lowered dealer buy prices on Wireless Pacific's extensive range of plug-in earpieces. These great to wear earpieces meet every workplace requirement and the NEW 25 plus bulk price helps reinforce personal OH & S issues to keep workplace hygiene and employee morale high. Ideal for security, convert operations, hospitality and events staff. ●
