WIRELESS PACIFIC™

Choosing the right headset

No matter what portable radio you have chosen, equipping it with the right audio accessory is when your investment really pays off. Some accessories are great for general everyday communications but if your staff need to operate in high noise environments then a headset might be what you need. Wireless Pacific have a range of headsets to suit the most demanding task, whether your people work in a timber mill, maintain an assembly line, crew for Nascar or provide stage security at a Megadeath concert, you can be secure knowing our headsets are built to do the job and keep everyone talking. Always choose the right headset for the environment you work in taking note of the need to ensure adequate hearing protection for your staff at all times.

Lightweight Headsets

WPHFH - Lightweight Noise Cancelling / WPMAD- Lightweight Headsets

WPHFH-X10

Our premium WPHFH noise cancelling Lightweight headset provides excellent transmission quality with minimal background noise so your message comes through loud and clear every time. Designed for all day wear, they provide clear communications in all work environments. They are ideal for handsfree operation when connected to Elite XHFO equipped handsets.

Using a WPIPBA adaptor, they are available for not only most popular portable radios, but also to suit mobile vehicle and RF Control office applications. The headsets feature hard wearing "quick disconnect" Hirose HR10 plugs so you can "personal issue" just the headset section to each operator while an in-line PTT if desired can be left connected to the radio device. This reduces purchase costs while still maintaining the highest levels of hygiene in all work environments!

The ultra lightweight WPMAD headsets are general purpose headsets offering all day wear comfort at a very cost effective pricing. Again they can be connected directly to all X10DR models or other compatible equipment or via XIPB or WPIPBA in line PTT adaptors

XMCH - Motorcycle Helmet Headsets

The XMCH motorcycle headsets are specifically designed for use by Motorcycle police and similarly demanding mission critical applications. Two models are available: an open face model and a closed helmet version.

WPMAD-X10

XMCH-C

XMCH-O

Smart Heavy Duty Headsets

WPSHD - Safety Yellow

Our noise cancelling Smart Heavy Duty headsets provide excellent transmission quality in extreme or high noise environments so your messages come through loud and clear every time. Designed for use with or without a safety helmet, the dual muff design also provides clear reception in almost all work environments by blocking out high levels of background noise from the users ears. The on-cup secondary PTT help ensure ease of communications in even the most demanding applications. A black canvas type carry bag is optionally available for work site storage or to help protect when transferred from venue to venue.

The SHD series features a folding arm mic and come in "safety yellow" to alert others that the user has reduced ambient listening and may not hear an approaching vehicle. They also include an on-cup volume control and a 3.5mm secondary audio jack for connection to an iPod® or racing scanner. They can also be further enhanced by ordering the **WPDHM** Extreme noise dynamic microphone option with 24dB NRR so you'll be heard loud and clear, even down in the pit amongst race cars or standing by blaring PA sound systems.

- Directional noise cancelling microphone
- Comfortable dual gel muffs
- Tough plug-in curly cords
- External audio input
- Ear cup plus in-line PTT buttons
- Ear cup volume control
- Speaker Volume switch

In-line PTT Adaptors

PTT adaptors are used to connect a number of headsets to the side accessory connector on your portable radio. They are built tough for the most demanding industrial applications using the finest materials and manufacturing techniques. Depending on your specific application one may be more suitable or allow you to operate more effectively or enhance the users safety.

WPIPB/XIPB - In-Line PTT adaptors

The WPIPB PTT adaptors are designed primarily for use with Wireless Pacific Heavy Duty headsets and provide a large in-line PTT button and use moulded connectors for rugged reliability and a rugged model specific, portable radio connector.

The XIPB adaptor is designed to be used with devices using Hirose HR10 connectors such as X10DR® and other compatible products. For use with the WPSHD a WPSHC-X10 curly cable is also required.

XIPB Adaptor

WPWLP-X10 - In-Line PTT adaptors

The WPWLP-X10 adaptor is a large low profile in-line PTT pad to allow easy PTT operation using an elbow or similar body pressure. It is designed to be used with X10DR® handsets and other compatible products. It features a Nexus U-174/U 4 pole headset input jack for use with all similarly equipped 3M Peltor® headsets or a WPSHD headset when connected via a WPSHC-NEX down cable.

The WPWLP-X10D is designed specifically for use with Draeger® series audio equipped breathing apparatus.

WPSHD-X

Heavy duty headset, Gel ear muff type with flexible microphone, PTT, vol. control, 3.5mm jack and mini XLR connector for replaceable radio interface cable.

General Specifications

Operating Temperature: $-20^{\circ}\pm 2^{\circ} \sim +50^{\circ}\pm 2^{\circ}$
Approx. Weight: 550g

Speaker Specifications

Speaker Dimensions 44.6 mm x 2
Impedance: 32 ohm
Rated Input Power: 2.0W
Max. Input Power: 3.0W
Output S.P.L: 86dB \pm 3dB
Frequency Response: 300Hz.~18KHz.
Distortion: <5 %Max

Microphone Specifications

Type and Dimension: Condenser Type
Output Impedance: 2.2K Ω \pm 10%
Sensitivity: -44dB \pm 3dB
Frequency Range: 50Hz~20KHz
Directivity: Uni-directional
Bias Voltage: Standard Voltage 2V
Max. Bias Voltage: 10V
S/N Ratio: More than 58dB

WPMAD-X10

Lightweight headset, single small muff type with flexible microphone arm, (no in-line PTT) with X10DR HR10 connector.

General Specifications

Operating Temperature: $-20^{\circ}\pm 2^{\circ} \sim +50^{\circ}\pm 2^{\circ}$
Approx. Weight: 200g

Speaker Specifications

Speaker Dimensions 30mm
Impedance: 32 ohm
Rated Input Power: 0.5W
Max. Input Power: 1.0W
Output S.P.L: 86dB \pm 3dB
Frequency Response: 300Hz.~18KHz.
Distortion: <5 %Max

Microphone Specifications

Type and Dimension: Condenser Type
Output Impedance: 2.2K Ω \pm 10%
Sensitivity: -44dB \pm 3dB
Frequency Range: 50Hz~20KHz
Directivity: Uni-directional
Bias Voltage: Standard Voltage 2V
Max. Bias Voltage: 10V
S/N Ratio: More than 50dB

WPHFH-X10

Lightweight headset, single small muff type with flexible noise cancelling microphone arm, (no in-line PTT) with X10DR HR10 connector.

General Specifications

Operating Temperature: $-20^{\circ}\pm 2^{\circ} \sim +50^{\circ}\pm 2^{\circ}$
Approx. Weight: 250g

Speaker Specifications

Speaker Dimensions 25mm
Impedance: 32 ohm
Rated Input Power: 0.5W
Max. Input Power: 1.0W
Output S.P.L: 86dB \pm 3dB
Frequency Response: 300Hz.~18KHz.
Distortion: <5 %Max

Microphone Specifications

Type and Dimension: Condenser Type
Output Impedance: 2.2K Ω \pm 10%
Sensitivity: -44dB \pm 3dB
Frequency Range: 50Hz~20KHz
Directivity: Uni-directional
Bias Voltage: Standard Voltage 2V
Max. Bias Voltage: 10V
S/N Ratio: More than 58dB

Warranty:

All Headset are covered by a full and comprehensive warranty and are warranted to be free from defects in material or workmanship including any associated accessories. Wireless Corporation will, at its option, replace or repair parts found defective and pay return shipping to the registered owner.

The warranty applies only to the original owner and does not apply to a headset which we determine has failed due to physical damage, corrosion, accident, unauthorized or improper use, repair or modification. The owner is responsible for the transportation costs of the equipment back to the place of purchase. In no case will Wireless Corporation Ltd accept responsibility for incidental or consequential damages.
